As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm.

Political attacks on the solar and storage industry are threatening more than 500 projects totaling nearly 116 gigawatts (GW) of capacity. That is more than half of all new power planned to be ...

With increasing investment in green energy, PV and energy storage demand in these regions continues to rise. The rise of India, the Middle East, Southeast Asia, and other emerging ...

Energy storage faces high risk in part due to its incredible success. " In recent years, developers have planned hundreds of gigawatts of storage capacity, thanks to falling costs and the ...

Several factors contribute to the uneven adoption of solar energy across the globe such as economic barriers, policy gaps and inconsistencies, grid integration and energy storage challenges ...

This article examines the key federal policy risks that lie ahead, their potential economic implications, and strategies that industry players can employ to mitigate adverse effects.

SEIA has released a report saying that political attacks are threatening 500 US solar and energy storage projects totaling nearly 116 GW of capacity, or about half of all planned capacity...

In our US solar market insight Q2 2025 report, created in collaboration with the Solar Energy Industries Association (SEIA), we dive into the federal policy headwinds and trade-action ...

SEIA has released a policy blueprint which it claims would "strengthen the reliability of America's electric grid with solar and storage."

Policy risks of photovoltaic energy storage

Solar-Plus-Storage Analysis For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify the economic and grid ...
