Mounting a King Tourer RTT on a roof platform can be challenging, but many users have found creative solutions. The supplied brackets are not designed for this purpose, so alternative ...

Yesterday, power went out for a few hours and then came back but the cameras and base station have not come back online. I know the house has power and Internet because I can get to all of my other ...

Follow a professional HVAC technician's systematic approach to diagnose and repair a Carrier rooftop unit with a tripped breaker and unusual 575V/480V transformer configuration. ...

I purchased a new base station a few years ago when I thought the base station was zapped by lightning. However, this base station is connected to a surge protector.

Mitigation of main and standby power system components typically is best achieved by elevating in place or relocating to an upper floor. If elevation in place or relocation is not practical, dry ...

Ideal for commercial and industrial rooftops, this support is perfect for HVAC systems, solar power installations, and other electrical setups requiring robust disconnect mounting. Enhance the reliability ...

Following a recent power outage, the Pro2 basestation shows as being offline, although the basestation has three green leds and seems fine. Has suffered power outages before and not ...

An overhead power connection from the utility lines to the service entrance is called the Service Drop. The service drop illustrated in Figure 1 has two 120V lines and a neutral conductor.

If you are dead set (no pun intended) on doing it, tie the carrier off using good climbing or poly rope (1/2") over the roof and tied to a substantial stable item.
