Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation ...

The Plan positions solid-state batteries as a core driver for breakthroughs in new-type energy storage technology, promoting their transition from the laboratory to large-scale commercial ...

The plan advocates for exploring and promoting the shared energy-storage model, encouraging new-energy power plants to deploy storage facilities through self-investment, leasing, or ...

The plan focuses on refining the compensation mechanism for peak-shaving and frequency-regulating power sources, ramping up the construction of pumped-storage projects, accelerating the ...

China aims to install more than 100 GW of new energy storage - primarily battery storage, excluding pumped hydro - by 2027, according to a new action plan presented by authorities ...

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies that can ...

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure ...

Based on a brief analysis of the global and Chinese energy storage markets in terms of size and future development, the publication delves into the relevant business models and cases of new energy ...
