The attraction of space-based solar power is easy to understand. Above the clouds and outside the day-night cycle, solar panels in orbit would receive nearly constant sunlight.

OverviewHistoryAdvantages and disadvantagesDesignLaunch costsBuilding from spaceSafetyTimelineIn 1941, science fiction writer Isaac Asimov published the science fiction short story "Reason", in which a space station transmits energy collected from the Sun to various planets. The SBSP concept, originally known as satellite solar-power system (SSPS), was first described in November 1968. In 1973 Peter Glaser was granted U.S. patent number 3,781,647 for his method of transmitting power over long distances (e.g. fro...
