Are criminals looking at solar panels?

And alongside machinery, recent figures from the UK police suggest criminals have set their sights on another lucrative opportunity - solar panels. Solar is currently only a small part of the UK's energy mix, but its share is growing, with estimates from Solar Energy UK suggesting the total solar capacity stands at 15 GW.

Are solar panels stolen?

By way of example, in August, solar panels worth approximately £10 500 were stolen from an energy farm in Northamptonshire. Solar panel theft is not limited to large scale and commercial solar farms either - homes in remote areas are also vulnerable, with thieves reportedly swiping panels from people's roofs. Why?

How does citizens for responsible solar Stoke opposition to solar projects?

Analysts who follow the industry say Citizens for Responsible Solar stokes opposition to solar projects by spreading misinformation online about health and environmental risks. The group's website says solar requires too much land for "unreliable energy," ignoring data showing power grids can run dependably on lots of renewables.

Are solar panels a good investment for a small farm?

After all, for a small farm, solar panels are a huge investment. Not only that, but if solar theft is not brought under control, it will delay the country from reaching its net zero goals. With nights growing darker earlier from October, the risk of theft increases, so action must be taken around this issue, and fast.

By way of example, in August, solar panels worth approximately £10 500 were stolen from an energy farm in Northamptonshire. Solar panel theft is not limited to large scale and ...
