Personnel in charge of using and maintaining the inverter must be properly qualified and educated for the tasks, and must be able to read and correctly interpret this product manual.

By RS485 interface, transfer the inverter power output information, alarm information, operation state to the PC terminal or local data acquisition device, then uploaded to the server.

If the inverter is to be mounted at a later time, ensure the coupling connector cover 04 is in place to protect the connector on the wiring box until the inverter is to be mounted.

It comes with a built - in function to activate lithium batteries using solar energy and grid power, and supports the connection of both lead - acid and lithium batteries.

Before using the inverter, please read all instructions and cautionary markings on the unit and in this manual. Put this manual to a place where you can take it easily.
