Are solar panels tax deductible?

Note that the Internal Revenue Service (IRS) accounts for half of the available tax credit, so you can depreciate the cost of your solar panels after subtracting half the federal tax credit amount.

What is solar depreciation?

Solar depreciation refers to the diminution in value of solar energy systems over time. It delineates the financial and tax considerations linked to the ownership and operation of solar technology. As a capital asset, solar panels undergo depreciation influenced by various factors, including wear and tear incurred during their operational life.

What is the depreciable life of solar panels?

In our example below, for Sunshine Hardware the depreciable life of solar panels is 80% of the full solar system cost which may be depreciated roughly as follows: Year 1 - 20%, Year 2 - 20%, Year 3 - 20%, Year 4 - 20%, Year 5 - 20%. Find out how this is calculated below. Request a free solar consultation to show what your numbers could look like.
