As solar panel technology improves, so does its return on investment and the savings you'll see over time. Federal solar incentives coupled with state-level incentives (if available) can help...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

Zero investment solar power lets you enjoy the benefits of solar energy without any upfront payment. The investment in solar with no upfront cost is installed on rooftop or property using photovoltaic cells ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for heat and to ...

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

Solar technologies are categorized as either passive or active depending on the way they capture, convert and distribute sunlight and enable solar energy to be harnessed at different levels around the ...

Solar panels offer compelling advantages that have driven their rapid adoption across diverse geographic and economic markets. Here's a detailed examination of the primary benefits ...

Solar photovoltaic panels do not require investment

When it comes to installing solar, our resources can help you determine the best options.

Solar panels are worth it for most homeowners, as long-term savings and increases in property value make up for the high initial installation costs. Whether solar panels are worth it depends on where ...

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.
