Designed for mobility and fast deployment, our foldable solar power containers combine solar modules, storage, and inverters into a single transportable unit. Ideal for emergency scenarios, rural ...

The distributed energy resources comprised of solar PV, batteries and remote monitoring technologies are being installed on a dairy farm in the Colonia Delta area, approximately 100km west of the capital ...

The project, owned and operated by AES Distributed Energy, consists of a 28 MW solar photovoltaic (PV) and a 100 MWh five-hour duration energy storage system. AES designed the unique DC ...

The repaired and eco-designed panels and upcycled fractions from EoL PV panels will be put up for sale on a specific marketplace, supported each product by a DPP system.

This article explores the technology's applications, market trends, and real-world success stories - perfect for solar installers, energy managers, and eco-conscious property owners.

Funded under the European Union's Horizon Europe programme, SOPHIA represents a forward-looking initiative designed to address one of the most pressing challenges in the renewable ...

SOPHIA is an EU-funded Horizon Europe project that aims to implement advanced digital solutions in end-of-life solar panels, involving the full value chain in order to increase their current reuse, repair ...

This study presents a novel bus charging station planning problem considering integrated photovoltaic (PV) and energy storage systems (PESS) to smooth the carbon-neutral transition of transportation.

Develop a prototype for a new eco-designed and easy dismantling PV panel using tailor-made debonding on-demand adhesives. Create a digital platform to implement Digital Product Passport ...

Sophia PV Distributed Energy Storage Project

SOPHIA is an EU-funded Horizon Europe project that aims to implement advanced digital solutions in end-of-life solar panels, involving the full value chain in order to increase their current ...
