In this guide, you'll get a clear, practical look at how solar canopy design really works--what structure types exist, what factors to consider, what mistakes to avoid, and how to ...

A solar parking design that allows columns to be spaced further apart than a T-canopy or other designs, covering entire parking lots with more solar panels than might otherwise fit over an area.

The elevated structure provides convenient routing for electrical conduits, while the solar panels can directly power charging stations during daylight hours. This combination creates a ...

Our design will add an area for your family or business to enjoy year-round. This not only adds outdoor living space but is also a decorative edifice for bifacial solar panel housing. Our system creates an ...

Solar canopies can be installed over parking lots, backyards, or even patios, transforming unused space into energy-producing assets. They're becoming an essential part of the solar ...

Solar Canopies (Structural Solar Supports) provide the framework for future installed electric charging station hardware. With columns on 18" centers, mounted charging stations will always be adjacent to ...

If you do not have a south facing roof, then you will not generate as much energy, ideally solar panels need to be installed on a south facing roof. Our solar canopies are free standing and can therefore ...

The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the assembly becomes ...

These kits are offered with single steel column or double aluminum column configurations. In addition, these grid tie systems are compatible with most electric vehicle charging stations, making them an ...

South Station Column-free Canopy Photovoltaic Panel

Parking garage, solar farm, ground mount, canopy, charging station, and more - we have the capability to design and fabricate elevated solar structures that meet your specific needs.
