Skeleton Technologies has officially opened its EUR220 million SuperFactory in Markranst#228;dt, near Leipzig. The facility is already delivering to Siemens, General Electric, and ...

Estonian-founded ultracapacitor maker Skeleton is investing EUR220 million in the Leipzig area to build the world's largest supercapacitor factory, producing extremely powerful energy storage ...

Estonian power infrastructure developer Skeleton Technologies has officially opened its EUR220 million (\$192.5m) SuperFactory in Markranst#228;dt, near Leipzig, Germany. The company ...

The facility, officially opened on November 28, 2025, is already supplying supercapacitors to Siemens, General Electric and Hitachi Energy for European electrical grid applications, as well as ...

Our upcoming production facility for graphene-based supercapacitors, the Leipzig Superfactory, will be the largest and most modern supercapacitor factory globally.

Skeleton Technologies opens a EUR220 million factory in Leipzig, enhancing Europe's electrical grid and AI infrastructure with innovative graphene-based supercapacitors, supporting ...

Here, we explore the top 7 supercapacitor manufacturers that are at the forefront of this technology, driving innovation and sustainability. 1. Maxwell Technologies (A Part of Tesla Inc.) ...

Alongside its current production capacity of 300,000 supercapacitor cells a year, or roughly 164 MW, Skeleton is also investing more than \$223 million in Europe's largest ...

With the use of patented "curved graphene" material, Skeleton's supercapacitors offer the highest power and energy density on the market, almost instant charging and discharging, high ...

Southern Europe Super High Current Capacitor Factory

The German-Estonian company Skeleton Technologies has opened a new factory for supercapacitors in Markranstädt near Leipzig. Around twelve million cells are to be produced in the ...
