When will Spain's grid investment plans be regulated?

A draft royal decree regulating the grid investment plans will be available to read until Oct. 6. The existing grid investment limits - of 0.13% of Spanish GDP for the transmission network and 0.065% for distribution - will be raised 62% to free up an additional EUR7.7 billion for distribution and EUR3.6 billion for transmission spending, through 2030.

How much did Europe invest in the transmission grid in 2022?

In 2022, in a context of economic recovery after the pandemic but marked by other geopolitical factors in Europe, investment in the transmission grid increased to 448.8 million euros, 14.8 % higher than the previous year.

How do smart grids contribute to the decarbonisation and electrification of the economy?

Smart grids contribute to the decarbonisation and electrification of the economy by facilitating the integration of renewable energy, sustainable mobility and self-consumption.

This project, together with the expansions in the 220 kV grid, will connect the Cerd&#225; substation and the meshed grid via two connection lines to the Hospitalet and Airport substations.

At an event in Madrid on Friday, the Spanish government presented the general outlines of its proposed Electricity Transmission Grid Planning strategy to 2030. Earlier in the week, capacity ...

We are tasked with ensuring that the transmission grid facilities are in optimal availability, reliability, and safety conditions to guarantee the power supply.

We are driving the ecological transition in Spain by advancing in the deployment of renewables, strengthening interconnections and storage solutions and with other strategic energy vectors.

The Spain dc power distribution cabinet market is experiencing robust growth driven by the nation's increasing focus on renewable energy integration and sustainable infrastructure...

# Spain Power Distribution Cabinet for Hospitals Grid-connected

Throughout 2024, transmission grid assets expanded by 487 kilometres of circuit and 197 substation bays, bringing the total length of line circuit in the national grid to 45,674 kilometres, a 1.1% increase ...

According to government projections, the new transmission planning will mobilise an unprecedented EUR13.5bn in investments by 2030. This will enable the grid to integrate new electricity ...

We will strengthen the grid to connect and integrate a new contingent of renewable generation at the pace set by the PNIEC and make it available to consumers.

At i-DE Redes Eléctricas Inteligentes, the distribution company of Iberdrola España, we continue to make progress in the transformation of electricity grids towards a smarter, more reliable and secure ...

Spain Distribution Cabinets Market has both EU-wide and national regulations that affect various industries. The report outlines key compliance requirements, sector-specific licenses, and...
