Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

Swiss Clean Battery AG (SCB) is planning to open a factory for sustainable solid-state batteries in Switzerland in 2024 with initial production of 1.2 GWh which will be eventually scaled to ...

In an ambitious bid to revolutionize energy storage and grid stabilization, a Swiss startup is integrating cutting-edge battery technology with renewable hydrogen systems to offer a ...

The Swiss company, founded in 2023, proposes using battery energy storage systems (BESS) for short-term grid fluctuations, while making use of stored hydrogen for "seasonal storage," ...

BKW, a Swiss energy company, is planning to invest up to CHF 500m in large-scale battery storage projects across various locations in the country, including Mühleberg, Bickigen, and Bassecourt.

With large battery storage systems playing an increasingly important role in the expansion of renewable energies, Axpo and energieUri AG plan to build their own facilities at the same industrial location in ...

This isn't science fiction - it's the reality for 15% of Swiss homeowners who've already installed battery storage systems. As Europe's unofficial "battery lab", Switzerland is pioneering energy storage ...

In general, Swiss villas need a battery storage system ranging from 15 to 30 kWh. For instance, a 400m² villa in Lugano with a 25 kW solar array would benefit from a minimum 20 kWh battery, like the ...

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

Swiss battery storage plans

In Kappel, in the canton of Solothurn, one of the largest battery storage systems in Switzerland is currently under construction, with a total capacity of 65 megawatt-hours. The successful delivery of ...
