Can I remotely access a Powerwall or Tesla Solar inverter system?

It is now possible to remotely access Powerwall or Tesla Solar Inverter systems via the Device Setup interface in Powerhub. This feature allows support personnel to change settings and/or troubleshoot a system directly. To allow support personnel to change system settings, Remove Service Access must be enabled.

How do I schedule a Tesla Powerwall service?

In the Tesla app, tap 'Support' at the bottom of your energy system home screen. On the Support screen, tap 'Schedule Service' on the Service section at the top. Note: 'Schedule Service' is only visible after we have determined that your Powerwall requires service. On the Confirm Appointment screen, review the date, time and service duration.

How does Tesla Powerwall work?

Tesla Powerwall is a rechargeable home battery system that stores solar energy for use at night and provides backup protection. When the grid goes down, your power stays on with Powerwall.

How do I connect my Tesla phone to my Powerwall?

To pair your phone, open the Tesla app and complete the following steps: From the home screen, open the 'Settings' menu. Tap 'Phone Pairing' > 'Begin Pairing.' To enable Service Mode, complete the following steps: From the home screen, open the 'Settings' menu. Tap 'Manage Access.' Toggle 'Mobile Service Access' to allow access to your Powerwall.

Using the Tesla app, you can monitor the system operation from your mobile device, including the following:
To download the latest version of the Tesla app, visit [tesla /support/tesla-app](https://tesla.com/support/tesla-app).
