Our goal is to help people understand how our grid is being fragilized and why we need fission to fix it. You can help us by sharing these episodes with your friends, family, and colleagues.

In Episode 1 of our #GridoftheFuture documentary series, we discuss the path to a clean energy future, with interviews from former FERC Chairman Norman Bay and New York ISO leaders.

Drift into the quiet story of the power grid -- from early generators and flickering streetlights to vast interconnected networks that deliver electricity across entire continents.

An excerpt from "Disasters." Wall Street Journal Reporter Katherine Blunt explains the California Wildfires to show how aging power grid failures can lead to disasters

The filmmakers will travel across the country engaging people in a dialogue about the issues that divide us and narrating their journey in search of how America may become more united as a nation.

A dynamic legion of energy, economic, national security, and infrastructure experts fearlessly expose our most critical global threat: the vulnerability of our nation's power grids. The film outlines the risk and ...

In our four-part documentary series "Behind the Grid", we will lift the curtain to show you: the upcoming challenges and hurdles with the supply chain for future grid projects. The Netherlands and many ...

That blackout and the fact that the ERCOT grid nearly collapsed, convinced us that we had to do another film. And now, three years later, we accomplished what we set out to do. Our five ...

"Grid Down, Power Up" is coming to Amazon and this September for a nationwide, remastered home release! Get ready for the ultimate experience as we bring the electrifying journey to the big ...

The Journey of the State Grid Micro-documentary

At the heart of Britain sits something so all pervasive we don't even notice it's there - the national electricity grid. This three-part series charts how our lives got wired and the impact electrification has ...
