---

Chinese solar manufacturer Longi unveiled a new PV module with 25.9% efficiency at the 2025 SNEC trade show this week in Shanghai, produced using both low- and high-temperature ...

The latest solar panel, based on its HPBC2.0 technology, opens a new chapter in the mass production of 24.8% high-efficiency solar products and continues to lead the reform of the ...

Solar panel technology advances include greater solar cell efficiency and the use of new and more abundant solar panel materials.

Longi, the China headquartered solar PV solutions giant, has launched its latest Hi-MO X10 solar module series at an event held in Shanghai. The new modules use Longi's 2nd generation ...

Back Contact (BC) Solar Technology Development White Paper At the key node of intergenerational transition of global Photovoltaic (PV) technology, the back contact (BC) cell technology is leading the ...

LONGi launches next gen 700W solar module using HIBC cell tech, setting new standards in solar efficiency and clean energy performance.

LONGi leads the solar energy revolution with PV technology, delivering high-efficiency modules, solutions, and full-cycle quality assurance.

Chinese solar technology giant Longi Green Energy Technology Co Ltd announced two new world records for solar cell efficiency recently, further cementing China's leading position in the ...

LONGi launched its mono-PERC modules in 2016, featuring integrated PERC technology on monocrystalline silicon and low light degradation, and its cell efficiency has increased from 21% to ...

# The latest technology of LONGi photovoltaic panels

During the World Future Energy Summit in Abu Dhabi, Mr. Mejdī Khayati, Technical Manager for MEA & CA Region at LONGi Solar shared technical insights into the next generation of PV innovation and ...
