Solar experienced the fastest growth among all power generation technologies in terms of electricity output, three times as much as wind power, which was ranked second.

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, ...

The power industry's trusted source for generation technology, O& M, and legal & regulatory news for coal, gas, nuclear, hydro, wind & solar power plants; power jobs

Wind energy has long been a cornerstone of the renewable energy sector, yet it faces increasing competition from solar power, supply chain disruptions, and shifting global policies. Here ...

Prospective utility-scale solar and wind capacity -- projects that have been announced or are in the pre-construction and construction phases -- grew by over 20% globally in 2024 from 3.6 ...

Explore technological advancements, offshore wind expansion, and the challenges shaping the industry in the coming years.

Solar PV will account for around 80% of the global increase in renewable power capacity over the next five years - driven by low costs and faster permitting timeframes - followed by wind, ...

By 2028, renewables are predicted to account for 42% of global electricity generation, with significant contributions from wind and solar photovoltaic (PV) technology, particularly in China, the ...

When solar energy, together with wind energy, forms a high share of power generation in a grid, any excess

The prospects of wind power and photovoltaic power generation companies

swings in power frequency can lead to blackouts, as seen in Spain and Portugal ...

2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...
