-----

Parabolic troughs are the most mature of the concentrating solar power technologies and they are commercially proven. The first systems were installed in 1912 near Cairo in Egypt to generate steam ...

DOE funds solar research and development (R& D) in parabolic trough systems as one of four concentrating solar power (CSP) technologies aiming to meet the goals of the SunShot Initiative.

Solar Energy Generating Systems (SEGS) is the name of the world's largest parabolic trough solar thermal electricity generation system, developed by Luz in southern California, USA.

The hot fluid can be piped to a heat engine (e.g. ORC or water/steam Rankine cycle), which uses the heat energy to drive machinery, or to generate electricity. This solar energy collector is the most ...

**TROUGH** definition: a long, narrow, open receptacle, usually boxlike in shape, used chiefly to hold water or food for animals. See examples of trough used in a sentence.

In geology, a trough generally refers to a linear structural depression that extends laterally over a distance, while being less steep than a trench. A trough can be a narrow basin or a geologic rift.

**Noun trough** (plural troughs) A long, narrow container, open on top, for feeding or watering animals.

**Define trough.** trough synonyms, trough pronunciation, trough translation, English dictionary definition of trough. n. 1. a. A long, narrow, generally shallow receptacle for holding water or feed for animals. b. ...

One of the most effective tools in the field of harnessing the sun's energy is the parabolic trough solar thermal collector. These collectors, designed to concentrate solar energy, have the potential to ...

**Definition of trough** noun in Oxford Advanced Learner's Dictionary. Meaning, pronunciation, picture, example sentences, grammar, usage notes, synonyms and more.

# Trough solar water power generation

In essence, parabolic troughs gather sunlight and direct it to a receiver tube located at the focal point, where a heat transfer fluid is heated and subsequently used to create steam. This ...

Such design represents the first effort of research to utilize a dual feedwater circuit inside the PTPP to increase the power output in the daylight from 50 to 68 MW el and raise night...
