DTEK Group, together with the U.S. company Fluence, a global leader in energy storage, commissioned 200 MW of capacity with a total storage volume of 400 MWh. The new facilities, ...

The top 15 solar energy storage manufacturers in Ukraine have played a key role in driving the transition to renewable energy, providing advanced technologies and reliable solutions to markets inside and ...

The project, developed by Energysave, features a 3.8 MW solar power plant coupled with a 6.9 MWh energy storage system. According to PV Magazine, the Ukrainian company has already ...

DTEK has officially launched Ukraine's first industrial lithium-ion, installed at the Zaporizhzhya Power Plant in the city of Energodar, with a capacity of 1 MW/2.25 MWh energy ...

This project is not only a step toward a new decentralized energy sector but also demonstrates the technological readiness of Ukrainian companies to implement complex ...

Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

Wait, no - that last point actually works in Ukraine's favor. With conventional power plants becoming strategic liabilities, distributed energy storage systems paired with solar offer both resilience and ...

In March, DTEK announced it was building Poland's first large electricity storage facility as part of its plan to establish a pan-European energy system connected to Ukraine.

Ukrainian solar power station with energy storage

One of the most promising solutions of this class was the Huawei Luna2000 with a capacity of 215 kWh, which has already proven its effectiveness in Ukrainian realities. This system ...
