Starting 1 April 2026, the value-added tax (VAT) export rebate for PV products and other items will be removed. The specific list of products is set out in a separate document.

The removal of a tax rebate for Chinese PV exports is set to drive up module prices as overseas buyers rush to secure lower-priced products.

Here's a list of countries that currently support 0% VAT or reduced VAT for residential solar installations. We're proud to confirm that PVSolar Store ships to all of these countries, with multiple ...

On January 9, 2026, China announced it will eliminate VAT export rebates for solar products effective April 1, 2026. This policy shift ends over a decade of export subsidies and marks a turning point for ...

The announcement, jointly issued by the Ministry of Finance and the State Taxation Administration, said that export tax rebates for the value added tax of photovoltaic products will be ...

If the products cost more than 60% of the total cost of installation, you'll only pay 5% VAT on the labour. You'll pay the standard rate of 20% VAT for the products.

China's Ministry of Finance and State Taxation Administration have announced a reduction in the export tax rebate for photovoltaic products. Starting Dec. 1, the rebate for ...

The change targets PV modules, wafers, cells and core manufacturing items; inverters, PV production equipment and certain structural components are exempt, and existing consumption ...

From Apr 1, 2026, China cancels VAT export rebates for solar and cuts battery rebates. Expect price resets--confirm HS codes and contracts.

China will eliminate value-added tax (VAT) export rebates for photovoltaic products from April 1, 2026,

VAT on solar module inverters

according to a joint notice released on Jan. 9 by the Ministry of Finance of the People's...
