Discover how Victoria Glass photovoltaic panels redefine solar energy efficiency with cutting-edge technology tailored for commercial and industrial applications. This article explores their unique ...

Suitable for both new constructions and renovation projects, our products integrate solar power generation with the high-performance and durability associated with architectural glass.

To meet a wide range of design and environmental performance targets, Solarvolt (TM) BIPV modules can be used with virtually any Vitro Glass product, including Starphire Ultra-Clear® glass, Acuity (TM) low ...

This innovative glass is designed to convert sunlight into electricity, combining the functional attributes of a building's envelope with the capability to generate clean energy.

Tailor-made glass-glass solar modules are particularly suitable for facades and other exterior applications. Solarvolt BIPV glass systems by Vitro Architectural Glass can be integrated into most ...

North America's leader in high-performance, low embodied carbon architectural glass Anchored by flagship products like Solarban®; solar-control low-e glass and Starphire Ultra-Clear®; low-iron glass, ...

The Solarvolt BIPV glass system replaces traditional facade cladding materials and enhances commercial building exteriors by providing sunshading, overhead glazing, CO2-free power ...

With its ability to block 60% of solar energy while allowing 70% of visible light to pass through, Solarban®; 60 glass can help you provide year-round comfort with heating and cooling cost savings.

The BIPV glass system is compatible with virtually all of Vitro's glass products, including Starphire Ultra-Clear®, Acuity (TM) low-iron and performance tinted glasses.

The NSG Group offers a range of specialised glass and coated glass products used in all of the leading solar

Victoria Glass solar Products

energy technologies, including thin film photovoltaics, crystalline silicon photovoltaics, ...
