Smaller-scale solar farms in Wales will no longer require direct ministerial approval for construction, helping to deliver billions of pounds of investment in renewables across the nation.

The main element of the development is the construction and operation of a solar farm that would supply up to 160 megawatts (MW) of renewable energy to the National Grid.

Known as G1öywn Byw, or "Butterfly", the solar array would be built on land to the south of Wrexham and have the potential to power more than 33,000 Welsh homes.

Welsh ministers have provided the go ahead for a 32MW solar project near Abergavenny, Wales. Renewable Connection submitted an official application to Planning and also Environment Decisions ...

A council has submitted plans to develop Wales' largest publicly-owned solar farm. Cwm Ifor solar farm, to be built near Penyrheol, Caerphilly county, is expected to cost between £12m and...

It can be seen that many applications for solar farm development have been focussed in South Wales; one reason for this is due to the relatively high radiation levels found there.

Plans what would be the biggest solar farm in Wales, at the Gwent Levels, with the capacity to provide enough green energy to power more than 100,000 homes, are progressing.

PLANS for a giant solar farm stretching across the boundaries of three Gwent authorities have been unveiled.

123.3 hectares of farmland across three local authorities in south Wales could become a solar farm. A proposal for a 304 acre solar farm spanning across three county boroughs in south ...
