In thin-film photovoltaic modules, the busbars pass directly through the cell area. The double-sided PET insulating tape fulfills two main functions: it is ideal for fixing the leads to the coated glass and ...

Norgard Film has become increasingly popular in solar photovoltaic applications as a transparent and insulative material for encapsulating and protecting solar cells.

Solar tape, also known as adhesive tape or mounting tape, is a type of tape specifically designed for solar panel installation. It offers a convenient and alternative method to traditional mounting systems, ...

This specialized tape facilitates efficient charge collection within solar modules, improving overall energy output. It's an integral part of modern solar panel designs.

The double side tape is impregnated with a "contact adhesive". The tape can be applied in between the solar module and the product case, the solar module and the motherboard (thicker tape can be used ...

Our single-sided cell-fixation tape holds solar cells and strings in place, not only for module production but also for the lifetime of the solar module.

Double-sided PE foam tape is a cornerstone for achieving high-quality, reliable adhesion in solar module frames. Its PE foam substrate offers an ideal combination of flexibility and internal ...

interconnection welding strip is a tinned solder tape used to connect PV cells and collect and transmit the current of PV cells.

Photovoltaic tape is a specialized adhesive strip designed to enhance the durability and efficiency of solar panels.

What is the tape in the middle of the photovoltaic panel

Photovoltaic tape, commonly referred to as PV tape, is an essential component in the world of solar energy. This specialized adhesive tape is specifically designed to facilitate the ...
