The Trump administration and congressional Republicans are attacking the entire wind power industry and throwing into question more than 17,000 offshore jobs and likely thousands more ...

As I wrote in a story last year, wind's early growth enabled utilities to shut down their dirtiest and most expensive fossil fuel power plants resulting in less emissions and air pollution.

Last month, the Trump administration abruptly halted construction on a nearly completed \$6 billion, 65-turbine wind farm off the coast of New England, known as Revolution Wind.

Shell pulled the plug on offshore wind projects in Massachusetts, South Korea, Ireland, France, and most recently, a \$1 billion wind farm off the New Jersey shore.

Can Wind Power Survive Trump's Efforts Against It? Wind turbine tower sections and blades at the Revolution Wind project assembly site in New London, Connecticut.

Storms Goretta, Ingrid and Chandra see UK break records for wind power in January Record-breaking wind power generation cut gas costs by more than \$1.6 billion in single month

On his first day in the Oval Office, President Donald Trump signed an executive order that attempts to slow the growth in the country's wind generation capacity.

WASHINGTON -- The Trump administration said Monday it is pausing leases for five large-scale offshore wind projects under construction along the East Coast due to what it said were ...

Between 2021 and 2050, wind speeds could decrease by up to 5%, with a potential 15% decline by the end of the century. These figures signal a significant impact on wind energy generation and the ...

Wind power generation was cut off by the wind

After Storm Fern cut power to millions, GoodPower CEO Leah Qusba explains what really failed on the grid, and why wind and solar weren't to blame.
