A wind turbine at a northern Colorado wind farm folded in half and caught fire Thursday morning, startling neighbors who heard banging noises prior to the collapse.

Fires in wind turbines are happening ten times more often than ...

One of the blades of a wind turbine was struck by lightning and it began to burn little by little until flaming pieces fell into the nacelle, causing a secondary fire, leading to the total loss of the wind turbine.

Fires in wind turbines are happening ten times more often than they are reported, according to new research from Imperial College London, the University of Edinburgh and SP ...

A fire in a wind turbine that sent smoke billowing over Mid North South Australia has sparked worries that such a blaze could result in a bushfire on a hotter and windier day.

When a nacelle catches fire, operators often must stand by until it burns out; in 90 % of cases the turbine suffers significant damage or total loss. With each turbine costing millions to build ...

OMAHA -- (DTN) On Tuesday, a wind turbine caught fire in Stuart, Iowa, above a harvested soybean field. Smoke billowed for hours and eventually the turbine blade fell, causing fire ...

This incident has brought to light the various factors that can lead to wind turbine fires, sparking discussions on how to mitigate these risks to ensure safer wind turbine operations.

In a heart-wrenching incident, two out of four maintenance engineers were stuck on a 67-meter wind turbine generator. Both engineers, standing on top of the burning turbine, hugged each ...

When a wind turbine catches fire, it can release toxic chemicals and pollutants into the air, which can harm the surrounding ecosystem and pose a health risk to nearby residents.

Wind turbine generator caught fire

A wind turbine fire outside of Abilene, Texas, is blamed for the Rhodes Ranch 3 Fire in Mulberry Canyon. The wind turbine caught on fire on Monday, August 26, 2019, and sparked the ...
